## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula I, wherein Y is N.

Group II, claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula I, wherein Y is CR5.

Group III, claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula II.

Group IV, claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula III.

Group V, claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula IV.

Group VI, claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula V.

Group VII claim(s) 1-15, drawn to particles and pharmaceutical dosage form containing the same, wherein the compound is defined by formula VI.

1. The inventions listed as Groups I -VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the compounds in group I -VII are structurally distinct compounds, and one of ordinary skill in the art would have reasonably expected that they

Art Unit: 1617

possess distinct chemical, physical, and biological properties. They therefore lack a core technical feature.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A) Various active compounds encompassed thereby;

B) Polymeric matrixes;

C) surfactants

Applicant is required, in reply to this action, to elect a single species from each of above groups to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special

Art Unit: 1617

technical features for the following reasons: the compounds, polymeric matrix and surfactants encompasses structurally distinct species.
